

Flooring Accessory Trims

Standard Threshold

Thresholds are typically used at door openings or to on top of the floor surface to bridge different flooring materials with the same thickness.

T530-188

1-7/8" overall width (custom sizes available)

**TJS
T&G Joining Strip**

1/4" 1/2"

Joining Strips are used to reverse the direction of T&G Flooring by joining two adjoining plank grooves together.

T504
Thin Shoe Mould
3/8" x 7/8"

T511
Standard Shoe Mould
3/4" x 3/4"

Custom Reducers

Reducers provide a transition to different flooring heights.

T530R-150
Thin Custom Reducer
1-1/2" overall width (custom sizes available)

Accommodates 3/8" to 1/2" custom heights

Custom Reducer T22R-275
2-3/4" overall width (custom sizes available)

Accommodates 1/2" to 3/4" custom heights

Reducers are custom manufactured to order. Please provide the transition to be made (height difference in inches) or the finished heights of both adjoining floors. Custom plows available to accommodate your specific installation.

Shoe Mould

Commonly installed on top of your baseboard at the finished floor junction, Shoe Mould is used to hide irregularities between your wall and floor and provides coverage of the necessary expansion gap between the floor and wall. Shoe Mould can match either the wood and finish of your baseboard or flooring.

Stock Flooring Accessory Trims illustrated on this page require **No Minimum order requirement when purchased with our flooring.** Please note that custom dimensions and plows are subject to additional machining charges and a separate \$20 setup fee.
